1. Customer Transactions Page

In Dynamics 365 Finance & Operations, once a customer transaction is posted, the records are stored and visible on the **Customer Transactions** page. This serves as the primary data source for AR reporting, aging analysis, and audit trails.

Customer transactions | EMSH-000009 : Microsoft Corporation

EMSH-80000040	Cash discount	2/28/2026			400.00	0.00	USD	19,200.00

2. Open Transactions Report

The **Open Customer Transactions** report shows all invoices that haven't been fully paid yet. It helps you see the exact remaining balance for each customer, even if they've made a partial payment. This report is the go-to tool for your collections team to track bills and keep the ledger accurate.

3. Customer Transactions Report

The **Customer Transactions** report provides a complete history of every financial activity recorded for each customer account. It consolidates all transaction types including invoices, payments, discounts, and write-offs and groups them by the customer for easy review. This report is the primary tool for auditing a customer's full balance and understanding the entire lifecycle of their account.

4. Customer Statement

The **Customer Statement** report provides a clear summary of a customer's account activity, including all invoices, payments, and the final outstanding balance over a specific period. It is primarily used as an external document sent to customers to remind them of their payment obligations and help reconcile their records with yours.

5. Aged Balances

The **Aged Balances** report is the primary tool for analyzing the health of your accounts receivable by categorizing outstanding invoices based on how long they have been overdue. It provides a strategic overview of your cash flow, helping you identify which customers are paying on time and which accounts require urgent collection efforts.

6. Sales Tax Specification

The **Sales Tax Specification** report in Dynamics 365 Finance & Operations provides a detailed breakdown of all sales tax calculated and recorded on customer transactions. It offers full transparency by showing the tax base amount, the tax percentage applied, and the resulting tax value for every invoice and credit note.
